

6S Application User Manual

Welcome to the 6S App! This manual is designed to help you navigate and use the app with ease. Whether you are a student, a sub-zonal head, a zonal head, or an administrator, this guide will walk you through exactly what you need to do, step-by-step.

1. Introduction to the App

The 6S App is designed to streamline and manage the 6S workflow process. Its main purpose is to ensure that every stage of our process—from student reporting to final administrative review—is tracked, organized, and easy to complete. Think of this app as your digital checklist and reporting tool, guiding you through your responsibilities quickly and efficiently.

2. The "6S Workflow" Phases

The core of our app is the 6S Workflow. This workflow is divided into four distinct phases, each handled by different users. Below is a breakdown of what each phase entails.

Students Phase

What it is: This is the starting point of the 6S process. In this phase, students are responsible for submitting their initial reports and logging their activities.

What you need to do:

Log In: Open the app and log in using your student credentials.

Access the Form: On your home screen, tap the "New Report" or "Submit 6S Form" button.

Fill in Details: You will see a straightforward form asking for your daily or weekly updates. Fill in the required fields (like dates, activities completed, and any notes).

Attach Proof (If Required): Tap the "Upload Image" or "Attach File" button to add any necessary photos or documents.

Submit: Once you have reviewed your information, tap the "Submit" button at the bottom of the screen. You will see a confirmation message once it goes through successfully.

Sub Zonal Phase

What it is: In this phase, Sub Zonal Heads review the submissions made by the students in their specific areas. They ensure the data is accurate and perform initial audits before passing it up the chain.

What you need to do:

Check Dashboard: Log in to your Sub Zonal account. Your dashboard will display a list of pending student reports that need your attention.

Review Reports: Tap on any pending report to open it. Read through the student's submission and view any attached files.

Approve or Reject:

If everything looks good, tap the "Approve" button.

If there are issues or missing information, tap "Reject" or "Request Changes." You may be prompted to type a short note explaining why.

Complete Sub Zonal Audit: Navigate to the "Audit" tab on your menu. Fill out the sub-zonal summary form for your area and tap "Submit Audit."

Zonal Phase

What it is: Zonal Heads oversee multiple sub-zones. In this phase, they review the approved audits from the Sub Zonal Heads to get a bird's-eye view of their entire zone's performance.

What you need to do:

View Zonal Dashboard: Log in to your Zonal account. Your main screen will show a summarized view of all sub-zones under your command.

Review Sub-Zonal Audits: Tap on the "Pending Audits" section to view reports submitted by Sub Zonal Heads.

Verify Information: Read through the summaries. You can tap on specific sub-zones to drill down into more detailed statistics.

Finalize Zonal Report: Once you have reviewed all necessary sub-zones, click the "Generate Zonal Report" button. Review the automatically compiled data, add any overall comments, and tap "Submit to Admin."

Admin Panel

What it is: This is the final administrative phase. System Administrators or top-level management use this phase to review the entire organization's data, manage users, and analyze overall metrics.

What you need to do:

Access Master Dashboard: Log in with Admin credentials to access the Master Dashboard. This screen provides high-level analytics, charts, and organizational health metrics.

Review Zonal Submissions: Navigate to the "Zones" tab to see the status of all Zonal reports. Tap on any zone to see detailed breakdowns.

Manage Users & Settings: Use the "User Management" tab to add new students, update Zonal Heads, or reset passwords.

Generate Analytics: Go to the "Analytics" tab to view or export comprehensive reports on the entire 6S workflow process for record-keeping or meetings.

3. App Features & Interface Walkthrough

Beyond the core workflow, the app includes several features designed to make your experience as smooth as possible.

Navigation Menu

What it is: The main way to get around the app. Depending on your device, this will either be a bar at the bottom of your screen or a menu icon (three horizontal lines) in the top corner. What you need to do: Tap the different icons (like Home, Profile, Analytics, or Settings) to switch between different screens instantly.

Dashboards

What it is: The first screen you see when you log in. It acts as your personal command center, showing you only the information relevant to your role. What you need to do: Use the dashboard to quickly check your "To-Do" list, view pending tasks, and see high-level summaries of your progress. Tap on any card or alert to dive deeper into that specific task.

Profile Settings

What it is: The area where your personal information and account preferences are stored. What you need to do: Tap the "Profile" icon (usually looking like a person silhouette). Here, you can update your contact information, change your password, and log out of the app safely.

Notifications / Advisories

What it is: A system to keep you updated on important events, like when a new report needs your review or if an administrator broadcasts an important message. What you need to do: Tap the "Bell" icon (often at the top right of the screen). This will open a list of your recent notifications. Tap on a notification to be taken directly to the relevant task or message.

Support & Help

What it is: Your lifeline if you run into technical issues or forget how to do something. What you need to do: Navigate to the "Settings" or "Profile" menu and look for "Help" or "Support." Tapping this will give you options to read FAQs, report a bug, or contact the technical team for assistance.
